

To whom it may concern,

We have worked on numerous projects with Brower Electric over the course of 25 years. The projects consist of everything from small tenant infill remodels to large industrial construction. We have worked with Brower Electric on countless projects in Missouri, Kansas, Iowa, and Illinois. Those projects have all had tight schedules and Brower Electric always works to make sure that those schedules are met. After completion of the projects, they are always attentive to the punchlist and warranty items.

If you have any questions feel free to contact me.

Re: Brower Electric

To Whom It May Concern:

Please accept this letter as my strong recommendation for Brower Electric. I have worked with Brower on over a dozen projects and the performance and service from both their field and office personnel has always been top notch. The projects that I have done with Brower have all had very tight timelines and they always work well with us to make sure those schedules are met. They are also very responsive to punch list and warranty items after the project is complete. We deal with many different subs on our projects and Brower is one of the few that I never have to worry about.

If you have any questions or need any additional information please do not hesitate to contact me.

Michael Patterson
